

Tuesday 26th September 2017

To write instructions for using an Archimedes Screw.

How to use and investigate your own Archimedes Screw.

Equipment:

2L bottle

marking tape

A narrow tube - approx 1m

large box (plastic, big enough for your bottle) and water.

Method

Firstly, Prepare the Archimedes Screw and large plastic bowl. ~~fill with water~~

Secondly, fill the large plastic box with any kind of water, and then place the Archimedes Screw where you know it will catch the water.

Now, place the Archimedes Screw in the large plastic box filled with water and turn the screw slowly.
